PROFILE

I am a Software Developer who is personate about solving problems and scaling it with Technology

EDUCATION

Messiah High School — Secondary School leaving certificate (SSCE) 2015- 2021

Oluwatosimile Montessori School - Primary six certificate - 2015-2012

EXPERIENCE

Full Stack Dev, Infoswap NG — June 2020 - August 2020

Single handedly built an advertisement website and applied changes both on Client's and Users(Prior to client's approval) demand while working remotely with a foreign client. Wrote frontend codes in spite my niche and managed both the server and database

Full Stack Developer, Messiah High School, Akure — March 2019 - September 2019

Single handedly built a fullstack e-portal for my school. Wrote both frontend and backend codes using Bootstrap, HTML 5, CSS3, JS, Python, Django. Got a Newspaper Interview. This was my first ever website

FREELANCE SOFTWARE DEVELOPMENT - AUGUST 2020 - TILL DATE

Book Store Restful API

Developed and Documented a Restful API with swagger which allows users to get books of their choice using Django Rest Framework. It has all the CRUD functionalities. Wrote quite a number of validations for all the forms. The book gets converted to pdf and gets downloaded immediately they pay using webhook.

Ecommerce website

Built an Online Store with frontend-backend codes which allows user to save to cart, filter to a category of products they want, order products etc. Integrated online payment using Flutterwave endpoint for users who want to pay for all the products in their cart.

News and Weather Restful API

Built a RestAPI which fetches the present Weather of the city queried and News of the query passed. Used Postman to test my Post and Get request. The more I learn, the more I make commits to this projects and build more

Virtual Assistant

Built a virtual assistant which is capable of playing your favourite song, controlling everything on your laptop, set reminder, tell you your plans for the day etc. It was built with Python and HTML, CSS and JS for frontend

SKILLS AND TECHNOLOGIES

Python; Django; FastAPI; DRF; Basic Ajax; Javascript; NodeJS; Express JS; GraphQL;

Heroku; MongoDB; Netlify; Git and Github; CI/CD; Swagger

Great at Tech; Motivated to succeed; Fast learner

INTEREST

Gaming, Travelling, Cars, Racing Games

MORE

I have really been eager to solve problems and scale them which prompted me to start coding as that is the fastest way to solve problems now. I was a member of Jet Club when I was in Secondary School. I was also the Assistant Senior boy during my set. I am very good at gaming although my friends argue it
