PROFILE

I am a Software Developer who is personate about solving problems and scaling it with Technology

EDUCATION

Messiah High School — Secondary School leaving certificate (SSCE) 2015- 2021
Oluwatosimile Montessori School — Primary six certificate (BECE) - 2015-2012

EXPERIENCE

Infoswap NG , Full Stack Dev — June 2020 - August 2020

Stack - Python/Django, Javascript, HTML, CSS, MongoDB, MySQL

Single handedly built an advertisement website and applied changes both on Client's and Users(Prior to client's approval) demand while working remotely with a foreign client. Wrote frontend codes in-spite my niche and managed both the server and database

Messiah High School , Full Stack Developer — March 2019 - September 2019

Stack - Python/Django, Javascript, HTML, CSS, MongoDB

Single handedly built a fullstack e-portal for my school. Wrote both frontend and backend codes using Bootstrap, HTML 5, CSS3, JS, Python, Django. Got a Newspaper Interview. This was my first ever website

FREELANCE SOFTWARE DEVELPMENT

Anonymous Message
- A web app which allows internet users to send registered users messages anonymously
- Uses Redis to aid faster response
- Built with Node JS, Express JS, MongoDB. [Demo] [Code]

Book Store Restful API
- Developed and Documented a Restful API with swagger which allows users to get books of their choice using Django Rest Framework.
- It has all the CRUD functionalities. Wrote quite a number of validations for all the forms.
- The book gets converted to pdf and gets downloaded immediately they pay using webhook. [Code]

Ecommerce website
- Built an Online Store with frontend-backend codes which allows users to save to cart, filter to a category of products they want, order products
- Integrated online payment using Flutterwave endpoint for users who want to pay for all the products in their cart. [Code]

News and WeatherRestful API
- Built a RestAPI which fetches the present Weather of the city queried and News of the query passed. Used Postman to test my Post and Get request.
- The more I learn, the more I make commits to this projects and build more [Code]

Virtual Assistant
- Built a virtual assistant which is capable of playing your favourite song, controlling everything on your laptop, set reminder, tell you your plans for the day etc
- It was built with Python and HTML, CSS and JS for frontend

SKILLS AND TECHNOLOGIES

Python; Django; FastAPI; DRF; Basic Ajax; Javascript; NodeJS; Express JS; GraphQL

Heroku; MongoDB; Netlify; Git and Github; CI/CD; Swagger; Restful API

Great at Tech; Motivated to succeed; Fast learner; Fast and Easy Adaptability

INTEREST

Gaming, Travelling, Cars, Racing Games

MORE

I have really been eager to solve problems and scale them which prompted me to start coding as that is the fastest way to solve problems now. I was a member of Jet Club when I was in Secondary School. I was also the Assistant Senior boy during my set. I am very good at gaming although my friends argue it
